OPEN SIDE PIPE VISE

It is a rugged screw-type vise that will hold tubing, drill pipe, manifold fittings and valves — in the field, shop, or warehouse.

* Type 1 — Mounted on Bolt-Down-Type Swivel Base: contains a Vise, Tray, and Swivel Mounting Post with a welded base plate for securing to the floor, etc., with bolts.
* Type 2 — Mounted on Swivel Base: contains a Vise, Tray, and Swivel Mounting Post to be cemented in place.
* The tray is generally used to catch grease or oil drips while making up or breaking out connections.
* The swivel mounting post lets the vise be rotated to whichever working angle is most convenient for the operator.
* The open-side jaw design allows pipe to be dropped in and lifted out without threading it through the vise end-to-end, speeding up rig-up and rig-down on location.
* Replaceable, hardened jaw inserts extend service life and can be swapped out in the field without removing the vise from its mount.

Size:

2-3/8" – 8-5/8" 2-3/8" – 15"

No.721, phase 2, Industrial zone 2 Andimeshk Road, Ahvaz, Khuzestan
