Wireline Surface Equipment

Description

Surface pressure-control and rig-up equipment used to conduct slickline and braided-line operations at the wellhead, including lubricators, stuffing boxes, grease injection heads and line-wipers.

Designed for fast rig-up/rig-down on land and offshore locations, with components sized to match the well's pressure rating and line diameter.

Applications

- Slickline & braided-line operations
- Well intervention rig-up
- Pressure control at the wellhead
- Land and offshore service units

Features:

- All-welded, pressure-rated construction
- Quick-union rig-up connections
- Interchangeable stuffing box packing
- Corrosion-resistant coating
- Compatible with multiple line sizes
- Compact, portable skid design
- Prepped, primed and painted finish
- Minimum maintenance design

Options:

- Multiple pressure-rating classes
- Custom line-size configuration
- Manual or hydraulic grease injection
- Alternative end-connection profiles
- Custom paint / coating spec

Build Notes:

Dimensions, ratings and materials are configured per project. Contact us with your application details for a tailored specification sheet.
