Downhole Running & Pulling Tools

Description

Tools used to run and retrieve downhole completion components — such as locks, plugs, valves and chokes — via slickline or braided-line, providing a positive mechanical connection during installation and retrieval.

Engineered for reliable engagement and release under well pressure and temperature conditions.

Applications

- Running/pulling downhole locks and plugs
- Standing and check valve service
- Choke and regulator installation/retrieval

Features:

- Positive mechanical lock/release mechanism
- High-strength alloy construction
- Standard API connection profiles
- Corrosion-resistant coating
- Compatible with standard lock mandrels
- Minimum maintenance design

Options:

- Custom running/pulling profiles
- Manual or shear-release mechanism
- Alternative materials on request
- Custom paint / coating spec

Build Notes:

Dimensions, ratings and materials are configured per project. Contact us with your application details for a tailored specification sheet.
