Well Completion Tools

Description

A broad range of tools supporting well completion operations, covering equipment used from perforation through to production start-up.

Built to standard oilfield specifications and configured to the well's completion design and operating envelope.

Applications

- Well completion operations
- Production start-up preparation
- Workover and re-completion service

Features:

- Application-specific design
- High-strength alloy construction
- Corrosion-resistant coating
- Standard API connection profiles
- Prepped, primed and painted finish
- Minimum maintenance design

Options:

- Custom configuration per completion design
- Alternative materials on request
- Custom paint / coating spec

Build Notes:

Dimensions, ratings and materials are configured per project. Contact us with your application details for a tailored specification sheet.
