Well Completion String

Description

Downhole string components — including packers, mandrels, nipples and subs — that make up the permanent or retrievable completion string run in the wellbore.

Manufactured to standard oilfield connection and pressure specifications for reliable long-term downhole service.

Applications

- Permanent and retrievable completions
- Zonal isolation and production control
- Workover and re-completion projects

Features:

- High-strength alloy construction
- Standard API connection profiles
- Corrosion-resistant coating
- Precision-machined sealing surfaces
- Prepped, primed and painted finish
- Minimum maintenance design

Options:

- Custom string configuration
- Alternative materials on request
- Custom connection profile
- Custom paint / coating spec

Build Notes:

Dimensions, ratings and materials are configured per project. Contact us with your application details for a tailored specification sheet.
