Well Head Plugs & Lubricators

Description

Wellhead plugs and lubricators used to maintain pressure control while running or retrieving tools through a live wellhead.

Sized to the wellhead's bore and pressure rating for secure, leak-tight sealing during rig-up and intervention work.

Applications

- Wellhead pressure isolation
- Tool rig-up under live well pressure
- Slickline and braided-line intervention

Features:

- Pressure-rated sealing design
- Corrosion-resistant coating
- Quick rig-up / rig-down connections
- High-strength alloy construction
- Compatible with standard wellhead profiles
- Minimum maintenance design

Options:

- Multiple pressure-rating classes
- Custom bore and connection size
- Alternative materials on request
- Custom paint / coating spec

Build Notes:

Dimensions, ratings and materials are configured per project. Contact us with your application details for a tailored specification sheet.
